

XTT
EXTENSIBLE TEST TOOL

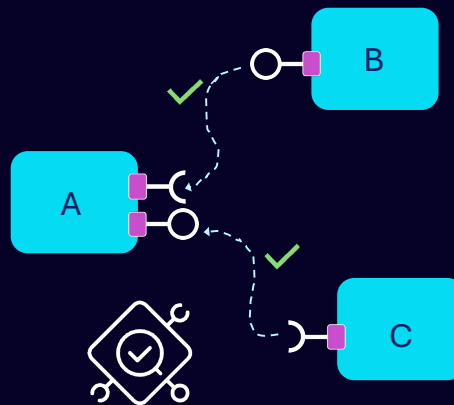

THE PROBLEM – WHY INTERFACE VALIDATION MATTERS?

- Complex architecture (many interfaces & systems)
- Time-consuming and rigid integrations
- Late discovered integration problems
- High iteration cost and delays
- Long time-to-production

COMPLEXITY SLOWS YOU DOWN. IT REDUCES INTEGRATION SPEED, ESCALATES COST, INCREASES RISK AND DEMORALIZES!

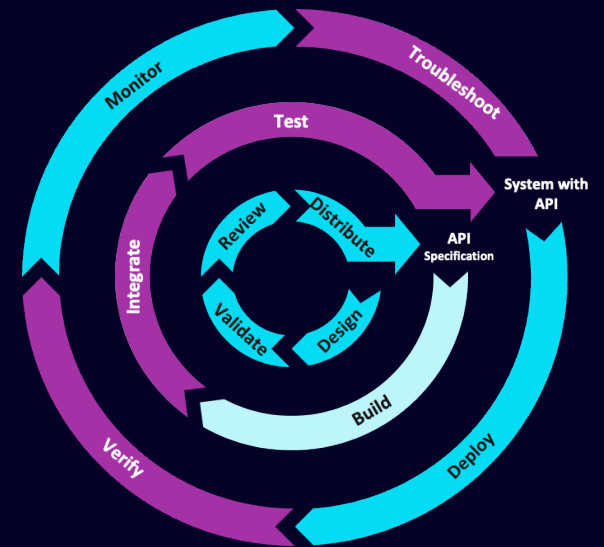

SPEED UP BY ALIGNING INTEGRATIONS & MANAGING API VERIFICATION

STANDARDIZATION - INTERFACE VALIDATION

- Interface first – develop and test API independently
- Detect and fix interface problems early in your own environment
- Reduce integration errors and iterations
- Faster time-to-production with predictable outcomes
- Simulate and mock your API providers and consumers

SUPPORT THE COMPLETE DEVELOPMENT PROCESS

- Reuse & precision: **3x** faster development
- Cost savings: **80%** shorter integration time
- ROI: **4x** efficiency gain per team
- Team load: **80%** reduced workload

*We proudly share our reference cases to provide credibility and transparency behind the figures.

Increase momentum stay competitive Faster Delivery Higher Value More Precision

EMPOWER YOUR ORGANISATION WITH THE INNOVATIVE TEST TOOL - XTT
