

AGT

API GOVERNANCE TOOL

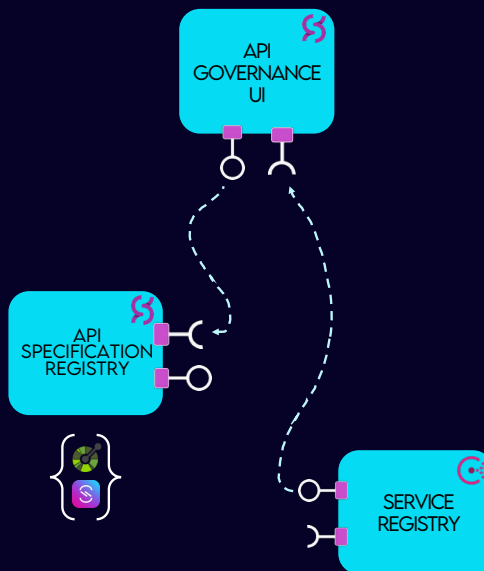

THE PROBLEM – WHY API-GOVERNANCE MATTERS?

- **Duplicate work:** Teams rebuild the same APIs. Little reuse. More one-offs.
- **Inconsistent quality:** No common standards for design or security.
- **Limited interoperability:** Services struggle to work across teams.
- **Hidden risk:** Poor visibility into active APIs, versions, and ownership.

DUPLICATION, CONFUSION, AND HIDDEN RISKS ARE KILLING SPEED AND INNOVATION

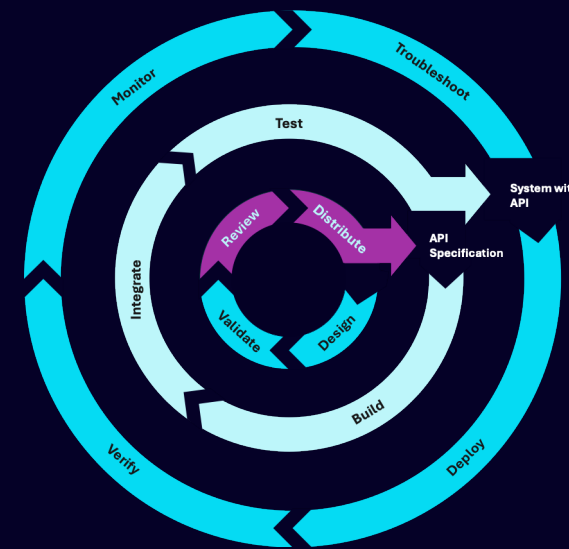

MAKE YOUR DEPLOYED IT VISIBLE – ENSURE IT FOLLOWS YOUR ARCHITECTURAL DESIGN

API GOVERNANCE TOOL – ENABLE CONFIDENT, DATA-DRIVEN DECISIONS ACROSS YOUR IT-LANDSCAPE

- Design intent, ownership, lifecycle and implementation are no longer separated
- Combines API Specification Registry, Service Registry and a Governance UI to create full visibility – from contract to runtime

CONTROL BY DESIGN

- **End-to-End Traceability:** Know exactly what runs and where
- **Single Source of Truth:** Trusted, versioned API contracts
- **Controlled Evolution:** Safe, predictable change
- **Runtime Visibility:** See live APIs and their usage

Increase momentum stay competitive Faster Delivery
Higher Value
More Precision
